

Pop Out World is an innovative and educational item useful to develop **concentration** and **creativity skills** in both kids (age 4+) and adults. These puzzles provide a high sense of accomplishment especially for children who are easily distracted. Building the 3D puzzle will offer a challenge in itself and so it entices **logical thinking**, **imagination** and **problem solving**. Such puzzles, whether used in a family or class environment, can be constructed by more than one person and so children can work as a team to build such a 3D model hence encouraging team work and developing **social skills**.

IMAGINATION

CREATIVE POWER

CONCENTRATION

LOGICAL THINKING

PROBLEM SOLVING

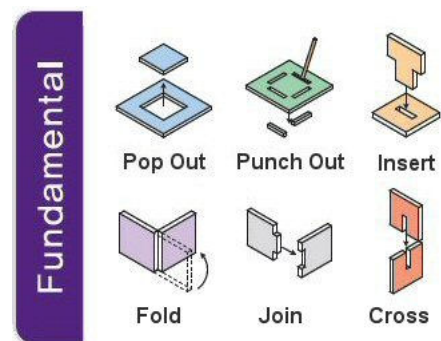

SOCIAL SKILLS

These three-dimensional (3D) jigsaw puzzles provide users with a new and different challenge since they do not lay flat on a table. A 3D jigsaw puzzle will provide puzzlers with a new challenge add a new dimension to puzzle building. **Pop Out World** 3D puzzles help children to have a more useful experience when playing, in addition to interest and support from parents. Such educational items are, therefore, ideal for kindergarten, primary and secondary schools.

Pop Out World 3D puzzles do not need any scissors, knives or glue to assemble. They only require one's hands and concentration.

While some items of **Pop Out World** 3D puzzles make you enjoy yourself with three simple actions, namely: **Pop out**; **Fold**; and **Assemble**, other relatively complex structures introduce: **Insertion**; **Folding** and **Crossing** activities as well. In fact, all of these activities form part of the fundamental actions for 3D puzzle building.

Pop Out World 3D puzzles are made of paper and foam board and are designed to build detailed structures through simple assembly. This product is created by an outstanding designer and developers working for our renowned supplier. Manufacturing of these puzzles is done by using high level of standards in quality and production material (ISO 9001 and ISO 14001).

Pop Out World 3D puzzles offer a wide variety of the products with different degrees of difficulty so that everyone can enjoy (starting from children aged 4 years to adulthood). There are over 500 types of large and small products with the best available quality and design and which form part of the following range of collections:

- world heritage sites and famous buildings;
- insect, animal, plant, and ecosystems;
- models of cars, airplanes, space craft and ships.
